

Aitken & Partners

Environmental Policy

J.J. Aitken & Partners Pty Ltd are consulting engineers who specialise in communications. Our expertise is focused on radio broadcasting, railway systems, radio propagation and EMC analysis.

We are committed to preventing pollution from normal, abnormal and emergency conditions through careful design and planning and the application of adequate operational controls.

Aitken & Partners are committed to reduction of our environmental impacts. We will achieve this through reduction of energy use and reduction of waste. We actively minimise solid waste to landfill, water usage, liquid wastes and emissions.

We are committed to using environmentally friendly materials and to compliance with all applicable regulatory requirements and environmental legislation. Our practice principles include minimisation of visual impacts from structures, reuse of structures and materials in design and minimisation of energy consumption and electromagnetic emissions in all designs.
