

Aitken & Partners

Privacy & Security Policy

Aitken & Partners has the following privacy policy regarding its collection, use and dissemination of personal and non-personal information collected through its web site ("Site"). Aitken & Partners reserves the right to modify its privacy policy at any time.

Collection of Non-Personal Information

When you visit a web page on the internet, your browser automatically identifies the IP address from which your page request was initiated. It also volunteers certain basic information like your browser type, your operating system and, in some cases, the page from which you referred to the Site. Aitken & Partners' server automatically collects this information and tracks it on a statistical basis and on a page by page basis.

Use of Non-Personal Information

Aitken & Partners may use non-personal information such as the region or country of the world from which your IP request emerged to select the best promotion and other information for your region or country. We also use browser type, operating system, and page visits for statistical analysis of site usage and navigation trends.

Use and Disclosure of Personal Information

We maintain personal information for statistical purposes to improve our Site for users' needs, to offer services, to administer the Site, to correspond with users and for other purposes related to the reason you gave it to us. Aitken & Partners will not give or sell this information to third parties.

External Links

The Site contains links to third party sites. Since Aitken & Partners does not control those websites, we encourage you to review the privacy policies of these third party sites.

Security

When you do business with Aitken & Partners we endeavour to transmit your information across the web with the highest degree of security possible. We use Secure Sockets Layer (SSL) technology which encrypts sensitive information such as your name, address, phone number, credit card etc.

Your personal information may be accessible to Aitken & Partners employees and to service providers whom we believe have a justified business reason to access your information. All personal information is protected through password access.
